High-speed broadband arrives in Duns Tew!

As part of the Better Broadband for Oxfordshire programme, a fibre-enabled cabinet is now live and ready to take orders in Duns Tew.

This means that 161 residents and businesses in the parish will be able to request an upgrade to fibre-enabled broadband from a range of Internet Service Providers (ISPs). In most cases, this means that residents can select a product offering download speeds above 24Mb/s following infrastructure upgrades made via the Better Broadband for Oxfordshire programme.

The aim of the £30.1m programme, funded by Oxfordshire County Council, Cherwell District Council, Broadband Delivery UK (BDUK) and BT, is to provide access to fibre-enabled broadband where this is not commercially viable without public sector investment.

The cabinet in the following location is now sporting a large sticker declaring, 'Fibre broadband is here.' This indicates that the cabinet is live and ready to take customer orders.

Steeple Aston Cabinet 2:

- Located outside Cedar Gables, North Aston Road, Duns Tew, Bicester, OX25 6JF
- Went live: 23/07/2015

| Steeple Aston 2: Serves 12 postcodes | |

| OX25 6JP | OX25 6LB |
| OX25 6JQ | OX25 6LD |

Please note that improved broadband services are not turned on automatically. To access fibre-enabled broadband, please contact your chosen ISP or use comparison sites to find available packages.

There is a list of ISPs on the Better Broadband for Oxfordshire website:

<http://www.betterbroadbandoxfordshire.org.uk/broadband-providers>

If you contact an ISP, please state that you wish to order 'fibre-enabled / superfast broadband,' otherwise they may offer you a slower broadband service. Your chosen ISP should be able to offer any technical assistance to access fibre-enabled / superfast broadband.

It is also important to note, that not all premises within a postcode area will be necessarily be able to order superfast speeds (above 24Mb/s). Premises will be able to access a range of speeds – some will get superfast broadband and others will be able to get anywhere between 2Mb/s and 24Mb/s, depending on distance from the cabinet.
